REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The patents to Huggins et al (US 4,003,740) and McGauley et al (US 3,860,696) do not disclose or suggest reacting metal-containing sulphidic materials with concentrated sulfuric acid in the presence of oxygen to produce a metal sulfate product as claimed. The patent to O'Brien (US 5,484,579) discloses a hydrometallurgical process comprising contacting ore with sulfuric acid and nitric acid and introducing a source of oxygen to the reaction mixture to form sulfates and a gaseous product which is NO_x (see Abstract and Fig.1) .

But O'Brien does not disclose or suggest carrying out the process at a temperature of between about 300°C and 400°C in the presence of oxygen to produce a solid metal sulfate product and a gaseous product which is primarily SO_3 as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
